

## Exciting change is on the way!

**As we strive to be a highly attractive and resourceful environment for families, we are getting ready to start the first phase of renovations to the Family Ministry spaces on our Oak Brook campus.**

Our first project involves creating corridors connecting the Discovery Center to the preschool hallways on both the upper and lower levels. This change will create a single point-of-entry and exit to our children and student ministry areas.

### Why is this important?

- We want our children's areas to be **easy for all families to navigate**, especially those who are new—we want their first impressions to be positive.
- **Improved security.** Our desire is to make sure we are doing everything we can to keep all children safe.

### How does this impact me?

- **Usual classrooms may have some temporary relocations.** Check [here](#) before heading to your groups or classes to see if there is a change and to find out where to go. Your child's nametag will also have room change information.

**Some other exciting changes** will include new carpet and remodeling to make space for a sensory room for children who may need a break from the stimulation of sound and activity.

In addition to some dust, you may also see rolling shelves, carts or toys in classrooms where you have events or classes. We need to empty closets and shift play items in a few areas during this project and store them elsewhere temporarily until the project is complete—hopefully by mid-December.

**We hope you experience joy and excitement as we live into our vision to LIFT kids and families as they build friendships and grow in their faith and discipleship.**
